I object strongly to the proposals of extending opening hours that are already way way beyond unsociable hours. This community centre is being built within metres of houses and homes and in a very quiet housing estate which has many many families with young children and with the constant noise this community centre is going to create from very early in the morning to very late at night it is unspeakable what disruption this is going to cause. For it to be open 7 days a week Meaning residents that will be living within metres will have no respite from it. Thus making their lives a misery. Doing this shows complete disregard to people's privacy and well being living in the area.
