Subject: P/19/1562/2 - Installation of 14 floodlights

I have concerns regarding the amount of flood lights proposed for this building.

Residents have already raised concerns regarding the existing lights which are causing light pollution to their homes and are infact causing problems to the wild life on Jubilee Walk.

No where in the application does it state whether this application is retrospective or are these floodlights over and above those already in place.

If a planning officer is mindful to permit this application I ask that it goes before a plans committee

regards

Cllr Radford
