I wish to object in the very strongest terms to the erection of 14 floodlights and a security tower as per this application. The impact of these items will have a huge detrimental affect for all of those residents who live within the vicinity of this factory. We are already having to suffer from the continual 24 hour drone of the factory which never stops - it is invasive and really makes living next to the factory an unpleasant experience - If I could move I would. Additionally we are often subjected to a horrendous loud alarm (up to 30 mins recently). All of the is bad enough - we genuinely thought that the passing of plans to emit goodness knows what rubbish in to our air was the last straw and now this...quite unbelievable. To think Shepshed is supposedly part of the National Forest -it is fast becoming anything but, however, despite the horrible drone of the factory day and night, we can at least appreciate the dark sky when night falls. We recently had the displeasure of flood lights around the factory during the night whilst work was carried out - it was horrific. I spoke to many of the neighbours and none of us could sleep properly, our nights were taken away and instead we were obliged to suffer the blare of bright lights - we might as well have been living next to a football pitch - at least those lights would go out after the game was over. I wonder how any of you would feel to have this nightmare thrust upon you personally - I strongly suspect you would be up in arms about it - well so am I. Our homes have been invaded with the extremely ugly sight and sound of those vile chimneys - my windows are constantly covered in a sticky extract which was not there before the chimneys arrived. I really think that the local residents have suffered more than enough. Please Charnwood BC, for once stand up for your residents and tell the factory enough is enough and refuse this monstrosity before our lives are completely ruined by unnecessary intrusive plans.
